Ex-President Harrison has publicly denied that he is a candidate for the United States Senate and would not accept the nomination under any circum stances.

It is indeed surprising that Pennsylvanians submit to the dictation of one man in the selection of United States senators. But, then, Pennsylvania is the "banner Republican state."

HAVING succeded so well at the last session of the general assembly in securing legislation to strengthen its monopoly, it is said the Standard Oil company, will make another effort, at the coming meeting of the state legislature, in the same direction. An attempt will be made to repeal the free pipe line law o 1883. That act grants all pipe lines the right of eminent domain. It was secured by the independent producers and refiners after years of hard fighting. The repeal of that law now would remove all competition in Pennsylvania and make the monopoly of the Standard practically absolute.

It is a mount of from Washington, says the Bellefon : Watchman, that the eading colored Republican club of that city, which was established in 1895 for the purpose of furthering McKinley's election, opposes the suggestion of a colored man as a member of McKin ley's cabinet. It proposes that the new President should give a numer of colored men a share of the loaves and fishes rather than to heap all the honor on

Do these deluded darkies think they have the slightest show for a cabinet oftice, or for any official positions which white Republicans may consider worth occupying? Though they elect Repub lican presidents it is foolish for them to expect any of the offices, except such as ere of a menial character, and their chances for even such are slim in competition with Republicans of the lowlown order who are willing to clean official cuspidors.

one by a cabinet appointment.

The colored brothers gave McKiuley nore than the popular majority tha elected him. The last census showed that there were 1,700,00 negroes in the country qualified to vote, and it is within bounds to say that of this number at least 1,200,000 voted at the last election, and as they are practically solid for Republican candidates, it is obvious that the votes they cast for McKinley numbered almost half million more than his popular majority, which has settled down to about 600,000

The addition of the vast mass of ne gro ignorance to the voting population of the country is one of the crimewhich the Republican party has committed against the Republic. They are committing another by utilizing the semi-barbarous hordes of Dagos and Huns as voting material, that ignorant mass having been secured by purchase and intimidation at the last election and were used conjointly with the ne groes in outvoting the intelligent arti sians and farmers who supported the Democratic ticket and constitutional bi-

Washington Letter.

Washington, December 12th, 1896 -Dear Boss: Unless you can buy several more senators it will be impossible to pay a tariff dividend on the incestnents of the late campaign " While the above is not the exact wording of the message sent by the caucus of Republi can senators to King Hanna, it contains the substance and real meaning of the request of the caucus steering committee, that Mr. Hanna shall try to ' influence" the election of senators who will pledge themselves to act with the Republicans on the tariff, in several Among the legislatures upon which the Republican senators desire Mr. Hanna to try his "influence" are those of North Carolina, Kentucky. Washington and South Dakota If high tariff senators can be secured for all all of these, the passage of a high tariff bill at the extra session of the next ongress will be assured. Otherwise the matter has been made very doubtful, with the chances against high tariff, by the action of the silver Republicans in declining invitations to enter the Repubican senatorial caucus

While the caucus of Republican senators did not by a formal vote abandon the Dingley tariff bill, they did what was practically the same thing when they referred it to the steering committee and mpowered that committee to act npon its own judgment. Pressure from the Republican senators to demonstrate by some sort of a vote, not necessarily on he bill itself, that the Dingley bill cannot pass, but the bill is as dead as Ben Harrison's force bill, so far as any serious attempt to pass it is concerned The Republicans couldn't pass it if they wanted to, and very few of them want to This was shown this week when the ill was before the senate for a few minates (on Senator Allen's motion to take it up, which was carried by a vote of 35 o 21), by the consternation which existed among the Republicans who had voted for the motion because they were afraid to do otherwise.

Representative Stokes of S. C. has been served with notice of a double con test for his seat in the present and m the next house. Dr. stokes came to Washngton iast year with the prop r certified by Mr. Johnson, a Republican. Finding nothing in the case upon which c base an excuse for giving Johnson the seat, the Republicans of the house were again candidates and Dr. Stok-s was elected to the vacancy and also to ends more upon the Republican maority than it does upon any evidence he expects to produce.

Senator Blanchard voiced the sentinent of nearly all of the Democrats in both branches of cangress when he said: The Democratic party, while beaten in he recent election, is compact, organied, and full of hope for the future. It imply bides its time. It has lost ma erial which can be spared, and gained ots of friends, adherents, and well-wishrs. It has always been a party of wonderfol recuperative capacity. It will be ready for the fray in 1898 and in 1900. Woe to the Republican party if it does not make good that dangerous promise
